For the attention of all the parents,

Subject: Operating language in the school

Dear all,

Following a few incidents that came to our attention recently we thought it is extremely important to communicate with you concerning the above mentioned issue.

For the purpose of maintaining consistency and fair treatment with all parents, especially where one parent speaks a language other than Greek, the school has adopted the policy of using only the English language in communicating with parents, in discussing administrative matters and issues related to the children's education and welfare.

In cases where both parents are Greek and they both have as their first language the Greek then the Greek language can be used instead.

This is the policy of our school as we would like all parents to feel included and welcomed in the school. At this point we would also like to assure you that this does not affect the Greek learning of your child.

When it comes to the teaching aspect, teachers have to use both the English and the Greek language as we maintain that it is important to ensure that each child clearly understands what he/she has to do in class especially for our younger children.

Warm Regards

Dr. Tryfonos Stella
Headteacher
